

# EPF TECH HUB PROJECT

## Languages

- PHP
- JavaScript

## Database

- MYSQL

## UI

- HTML
- CSS

## Local Server

- XAMPP

## Pages

- config.php
- Index.php
- Script.js
- Style.css
- Data.php

## Modules

- Node modules

## Background

The user is required to enter the required information then upload the xlsx file and the information along with the path the file will be stored in will be inserted into a database using PHP. The Double bar graph will be drawn using JavaScript with a help of SheetJS which is the JavaScript dependency. This dependency will help us read data from the excel file and be able to get the values for our graph.

## System Flow

- User enters required information (index.php) then redirected to data.php
- User can view the Graph (data.php)
